Automatic Retractable Gate

we make your world secure 🔑

## Standard Functions & Features

- The retractable gate has single track, double track and trackless mode selection.
- Electric power: 370W (optional 420W, 550W); running speed: 5 seconds/m.
- Robust motor: High stability, large output torque, can adapt to frequent forward and reverse rotation, compact structure, embedded thermal protection device, prolonged motor life.
- Suitability: All gates on level concrete floor (there should be no obvious steps and potholes on the ground).
- Wear-resistant body: Each part is assembled with stainless steel tube, shaft, stainless steel nut, nylon rubber gasket. Lubricating oil is added to each link, and PV sleeve is used.
- The motor is equipped with overheating and overload protection devices. When the motor continuously runs to a certain temperature, it will automatically cut off the power and enter the protection state to prolong the service life of the motor.
- The gates' motor is equipped with a manual clutch. When the power is off or overhauled, the manual clutch key can be used to open the clutch device by manually pushing the door body to run.
- Applications with smart devices:
  1. Access Control (fingerprint password, fingerprint access control, password swiping)
  2. License plate recognition
  3. Face recognition
  4. Bluetooth recognition
  5. Mobile App, etc
- Safety features also include anti-climbing and anti-push alarm system, intelligent infrared double probe anti-collision device. These add another safety guarantee for users (optional accessory).
- The gates' body can be equipped with colourful LED scrolling display.
